

# OffTheWalls<sup>®</sup>

[ ] Habillage d'espace sur-mesure

**# Collection** 2017

Created by Guillaume Klein

[off-the-wall] - *Adj. Informal:* Anglo-Saxon expression that qualifies something unexpected, unique, original, strange, extraordinary, offbeat, absurd, funny, extravagant, “funky”.

Off The Walls© was created in 2008 by Guillaume Klein, french graphic designer graduated from the Beaux-Arts – architecture and design department – self-employed for more than fifteen years.

As a space designer, he composes installations and creates original and unique graphic models, adapted to the casing of spaces or objects.

## High-end and completely customizable tailor-made models

Discover the new collection of customizable models.

This collection is original, still very elegant with an uncluttered graphic style. It is aimed to offer new atmospheres by playing on perception of space through a series of trompe l'oeil, patterns and bas-reliefs. This style produces a subtle impression of depth; it transforms and energizes space by playing with perspectives.

The design of the collection is mainly inspired by nature with simple abstract, organic, parametric or geometric shapes in a modern, pop, futuristic and retro-vintage spirit revisited.

Each model is offered in different colors and depictions. Models are presented in the format 2.5 x 4 meters by default; however format, colors and scale of most models remain totally customizable

For a truly unique result, it is possible to customize the chosen model according to different criteria:

- dimensions, depending on the surface to coat
- colors and tones
- scale of the pattern (for most models)
- printing media (more information on the services page)

Each print is a unique creation made exclusively on order. Models are studied with precision and attention to detail in order to be admired as well from near to far, with a sharpness of very high quality, whatever the final size.

Models can be applied to interior surfaces (walls, floors, ceilings) and exterior surfaces (aluminum, Plexiglas or wood panels).

Prints are made in France and Germany by reputed manufacturers who respect quality, safety and environmental standards, such as Architects Paper. All is aimed for an optimal and high-end result.
